# PRECIOUS TENT: JEWEL COVER FOR LUXURY PLACE

## THE BRAND

Precious Tent is Coverhat's luxury division and it deals with the achievement of top-level structures to cover common areas or to create wellbeing, exclusive ones. "Jewel", its inspiration.

"Jewel" like the achieved projects, architectural evolution and design of gazebos, winter gardens, berceau. "Jewel" like the exclusive designs that are a perfect mix of art, architecture and interior design. "Jewel" like the materials used, noble and rare, and their manufacturing, precious, being realized by craftsmen. "Jewel" like the furniture used in every area devoted to wellbeing, sharing, peace cult and stillness exaltation. Exclusive solutions, which speak the language of high quality gazebos, green houses, luxury verandas, where you can discover the pleasure to snuggle without giving up conveniences such as underfloor heating and sound system.

"Precious Tent – says Roberto Rescia, Managing Director Coverhat – it's not only a brand, but a love proposal with which people give themselves a place to take care of themselves and rediscover the value of peace. A "wrapping" place not only for its shapes, but also for the meticulous choice of the details that define it, whether it is furnishings, inlays or mosaics. Because feeling good is priceless".

## **OUR PHILOSOPHY**

Cultivate peace, recover full wellbeing, learning the deepest sense of relax: Precious Tent's projects follow this path giving shape to ideas, dreams, desires. Wellbeing becomes inspiration and philosophy, aim and achievement: everything is designed to achieve the maximum comfort whether it is materials, shapes and lines, games of light and aesthetic contaminations.

"There is a strong link between places and emotions: *Precious Tent creates the perfect contexts to let yourself carried away by emotion, to retrieve full contact with yourself, to listen to your desires. So it happens that those gazebos become charming cots where you can lay down in silence reading a book or getting lost in contemplation. The awareness of having to create such emotional*  environments, where you can seek refuge in full serenity, guides each of our achievements.

### THE CULT OF THE MATERIALS

Precious woods, such as iroko, ebony, teak for bearing structures, and doussie for floors, but also wrought iron by the craftsmanship of the best Italian blacksmiths or stainless steel for those who love tech design: Precious Tent chooses materials of excellence for its accomplishments and relies upon the tenacious Italian style and taste both of architects and interior designers, to give soul to designed solutions for wellbeing. Pure comfort's places where everything is a sign of sophistication and uniqueness, the balance between aesthetic and environmental integration, worship and exaltation of the detail.

"We only choose rare and precious materials for our products, because we know that their value is the core of the uniqueness of our projects. One more reason to choose Precious Tent".

#### WHEN COOSING PRECIOUS TENT

To furnish the wide terrace or expand the domestic space, so as to carve out "relax" cots, destined to wellbeing and peace. To create comfort zones in the garden area which can combine design and nature, without giving up luxury conveniences. To increase the value of your home and make it even more precious, thanks to the design of attractive and enjoyable niches intended for moments sharing.

#### THE COMPANY

Coverhat starts from Roberto Rescia and his over ten years' experience in design, manufacture and installation of architectural complete roofing systems, which are a harmonious fusion of technology, functionality and aesthetics.

A dynamic, flexible and creative staff of professionals (architects, engineers, interior designers, assemblers), supported by specialist constructive skills and by technical knowledge of materials, creates high performance customized solutions, able to fit a need or a desire.

Thanks to the close cooperation with those players sharing the same philosophy and vision, Coverhat also provides hi-tech facilities suitable for the proper functioning of

the structures, an efficient, prompt and attentive to detail production, and a customer service ready to take action promptly and efficiently.

In addition to design and implementation, the company also coordinates every step of the activity, manages the logistic, and finally plans the execution, dealing with potential problems and finding the best solutions to ensure an outcome that can maximize the cost/benefit binomial.
